PERSONAL DETAILS

As a computer engineering finalist, I have learned in depth about infrastructures and programming languages that help in their implementation in an automated way through Scripts. Meanwhile, I also have knowledge in BackEnd, FrontEnd and Dice Base technology. I consider myself a person of easy adaptation to the work environment, high sense of responsibility, ability to work in a team and a good listener.

WORK EXPERIENCE

February – October 2022 I interned in the Cloud Engineer area for the implementation of infrastructure as code (IaC) in a cloud provider (Azure and AWS) as well as the development of an architecture, in the Claranet organization, a company focused on managed services.

March - June 2021, I participated in the project to develop a software for mobile and web through the Polytechnic Institute of Viseu (IPV) in collaboration with Bizdirect (currently Claranet). This software consisted of informing through a heat map if a given location was very, medium or little busy via the report of users in each location.

EDUCATION

I am currently a finalist in the degree course of computer engineering at the Polytechnic Institute of Viseu - IPV.

Secondary Education Concluded at Secondary School No. 4070- CACUACO

TECHNOLOGYS

- JavaScript, C++, HTML, CSS
- Terraform, Ansible
- React, REST API
- Node JS, MySQL
- Git, Github, Bitbucket
- Trello, Azure, Azure DevOps, AWS

QUALIFICATIONS

- Az-900 Certificate – 2022 - Udemy – Claranet

LANGUAGES

- English – professional
- Português – Fluent
